PROFILE

Enthusiastic and detail-oriented junior Python Back-End developer with a passion for crafting robust and scalable solutions. Proficient in Python programming language and eager to expand skills in back-end development. Adept at collaborating with cross-functional teams to deliver high-quality software products. Committed to continuous learning and staying updated with industry best practices.

SKILLS

- Proficient in writing Python code for back-end development.
- Solid understanding of Flask and Django frameworks for building web applications.
- Strong knowledge of SQLAlchemy, PostgreSQL, SQLite for database management and interaction.
- Knowledge of Docker, images and containers.
- Strong understanding of RESTful principles and ability to build APIs.
- Ability to implement user authentication and authorization, input validation, users interaction.
- Experience with HTML, CSS and JavaScript for front-end development, styling and scripting, including Bootstrap.
- Knowledge of Git and version control systems.
- Strong problem-solving and debugging abilities.

PROJECTS

- Dynamic Django-based Solana Wallet Tracker web application enabling users to monitor their cryptocurrency assets in real-time ([trackoff.app](#)).
- Portfolio Flask-based website built using Bootstrap, integrating GitHub REST API, a contact form with form validation, SMTP library to send emails ([ebarinov.com](#)).
- Flask Blog web application, includes authorization and authentication, dynamically rendered articles, comments, images and etc.
- Flask web Movie Manager application, using (TMDB) API to fetch movie details and enable adding, editing, and deleting movies, including reviews and ratings for each movie.
- Check my GitHub profile for more ([github.com/georgebrnv](#)).

EXPERIENCE

Community Manager at Solana NFT Project

Aug 2023 - Jan 2024

- Foster active participation and interaction within the NFT community.
- Expand the community through outreach efforts and strategic partnerships to improve the product.
- Organize virtual events, workshops, and meetups to connect with community members.
- Collect, analyze, and act on community feedback to enhance the project.
- Maintain a positive and respectful community atmosphere.

Student-contributor at "Goldfinch"

Feb 2023 - Feb 2024

- Learnt the fundamentals of Python programming language such as variables, data types, control structures, functions, and classes.
- I have been assigned simple projects and tasks within a larger project to apply my Python skills.
- Collaborate with other team members, including more experienced developers and mentors, to contribute to the overall project.
- Received feedback on my work from mentors and use it to iterate and improve my code.
